

Max WiFi - Wireless Network Engineer - Job Description

Max WiFi have a great opportunity for an experienced Wireless Network Engineer to join our team due to an increase in workload post-covid.

Max WiFi are a global event WiFi provider specialising in the installation of both temporary and permanent WiFi networks to the events and venue industries. We are among the market leaders in our field with over 15 years' in operation and a fantastic client base which includes high profile live events in the sporting, exhibition, festival and conference sectors as well as renowned events venues across the UK.

The right person for the role should have experience/skills including:

- Deploying and supporting Enterprise LAN/WLAN infrastructure in challenging environments.
- Producing high level and low-level design documentation.
- Be comfortable troubleshooting complex network issues
- Experience in RF Design using Ekahau and Pre/Post Site Validation Surveys
- Strong understanding of RF Fundamentals
- Proficient in Cisco and Ruckus Wireless and Wired portfolios.
- Experience in Multi-Vendor Network Deployment.
- Strong communication skills, you will often interface with clients directly.
- Demonstrable evidence of high density wireless deployments.
- CCNA/CCNP Accredited, CWNA Accredited strongly advised
- Experience working within the events industry or in temporary deployments is beneficial.
- Ability to work to tight deadlines and solve problems quickly.

To apply or find out more information, please contact Max WiFi by emailing your CV to events@maxwifi.co.uk
